

DUPLEX FOOT SWITCH

LINEMASTER's Duplex foot switch operates as a heel-toe rocker switch allowing the user to operate 2 functions with a single foot pedal look. At rest the pedal is in the off position, but pressing down with your heel or toe will activate a function. The Duplex accommodates a wide range of cable sizes and offers an EN 60529 Degree of Protection IP20. Do you have special requirements? Please contact Linemaster for a quotation for a custom variation built to your specifications, including cordset, paint finish, and labeling.
